

ITAR Statement

- **ITAR** registration is required for any U.S. company that manufactures controlled defense articles, defined on the U.S. Munitions List (USML) under the U.S. Department of State, and is a precondition to apply for an export license or exemption.
- **Currently Sigatek's products are NOT controlled on the USML.** They are classified under the U.S. Department of Commerce as **EAR99** - no license required.

As mentioned above, all of our products are classified under the U.S. Department of Commerce as **EAR99** (uncontrolled - no license required).

Although all Sigatek's products are considered "uncontrolled" and classified as **EAR99** which do not require under most circumstances an export license, these same products under European Laws and Regulations may be considered "controlled".

Therefore European Laws and Regulations should be reviewed and followed prior to any export or re-export of Sigatek's products.

Sincerely,

Michael Chilimintris
General Manager
Export Compliance Administrator
Sigatek LLC
